

Wisconsin Disaster Medical Response Team Medical Reserve Corps *Mobile Medical Care Facility*

Sept. 2013

What is the MMCF?

The Mobile Medical Care Facility (MMCF) is a series of 4 Mobile Medical Unit (MMU) shelters that, when combined, form a forty bed medical care center. The facility deploys with standard medical equipment found in most emergency rooms and specialty equipment that includes burn supplies to treat 20 burn patients, pediatric emergency medical equipment, and Personal Protective Equipment (PPE) for working in a biological or radiological terrorism incident.

How do I request the MMCF?

The Mobile Medical Care Facility can be deployed during a disaster at the request of a healthcare facility or local jurisdiction to the Wisconsin Disaster Medical Response Team Medical Reserve Corps Duty Officer at 920-586-1325.

For non-disaster deployments, local exercises or questions regarding the Mobile Medical Care Facility, please contact Wisconsin Disaster Medical Response Team Medical Reserve Corps at 920-558-4113 or email wdrmtmrc@gmail.com

What is it used for?

The MMCF's primary mission is to serve as a replacement for or supplement to local medical care after a disaster or during special events. For example, if a community experiences a tornado or flood which damages or overwhelms its medical care facilities, the MMCF can be deployed to the community until the local health resources are functioning normally again. Other uses include as a First Aid Station, a Point Of Dispensing Site for mass immunizations during a public health event a Mass Casualty Treatment Facility or an Alternate Care Site designed to provide low acuity ambulatory care.

Who will staff the MMCF?

The MMCF can be staffed by the members of a requesting healthcare facility or public health department. The MRC can provide logistical set up and support to the requesting organization. For a surge event the facility, in compliance with the National Incident Management System Resource Typing System, can be staffed by the Wisconsin Disaster Medical Response Team - Medical Reserve Corps. The MRC will follow the typing requirements of a Mobile Field Medical Team Type I, which is capable of providing a wide range of clinical services.
